

**Dr. Hemraj Chhipa**

Research Associate

TERI Deakin Nanobiotechnology Centre

hemraj.chhipa@teri.res.in

Dr. Hemraj Chhipa received his Doctorate degree in Microbiology from Maharshi Dayanand Saraswati University, Ajmer (Rajasthan). During his Ph.D. he worked on biosorption and bioaccumulation of Fluoride using fungal biomass. After PhD, Dr. Chhipa was selected for Endeavour Research Fellowship, Govt. of Australia and worked on nanomaterial synthesis and their biological application with Nano-biotechnology Research Group at Royal Melbourne Institute of Technology (RMIT), Melbourne, Australia.

Currently, he is working as Research Associate in TERI Deakin Nanobiotechnology Centre, New Delhi. His area of expertise is molecular identification of microbes and their bio-prospecting for agricultural applications. He has published 11 research articles and 2 book chapters in peer reviewed Journals.
