

Dr. Reena Singh

Fellow & Area Convener

Centre for Mycorrhizal Research

Sustainable Agriculture Division,

The Energy & Resources Institute

E-mail: reenas@teri.res.in

Dr Reena Singh is a Mycorrhizologist with Ph.D. in Microbiology. She has been working on the execution and diffusion of greener and sustainable agriculture solutions in India for over 20 years. Her experience ranges from programme formulation, through project implementation, as well as outreach through trainings, workshops, seminars and conferences. Her exposure combines different facets of biofertilizers, wasteland reclamation industry as well as research domain. Currently, she is responsible for research activities in the fields of mycorrhiza, reclamation technology applications, and quality aspects of mycorrhiza; including dealing with transnational clients/partners. She is well - versed in developing and working in large global projects involving multi-nations and multi-stakeholders such as Indo-Swiss (biofertilizer project), Indo-Finland (Rhizocompost project) and FP7 Biorefinery network project.
